August 12, 2009

Dear Parents,

For the last few years, our athletic trainer has conducted a computer test with our athletes to establish a baseline to help diagnose concussions. As many of you are aware, concussions can be very dangerous and we take this very seriously. The testing is done on a computer under the supervision of our athletic trainer. The athlete performs a series of tasks that is entered into the computer to establish a baseline score that we can refer to if we suspect your son or daughter has a concussion. This information can be given to our school physician or your physician to help them determine the seriousness of the injury. This test will be mandatory, but will not be given to any athlete who took the test last year. Thank you for your continued cooperation concerning this important health issue. If you have any questions, please contact our athletic trainer Nicole Member at 973-887-3004 ext. 3235.

Sincerely,

Nicole Member
Athletic Trainer
